

# Table of Contents

## Chapter 1: Project Startup

Starting the KINGDOM software . . . . .	1.1
Open the Project . . . . .	1.1
Cartographic Projection Method. . . . .	1.6
Colorbars . . . . .	1.7
User Preferences . . . . .	1.7
Select or Create an Author. . . . .	1.10
Author Management. . . . .	1.11

## Chapter 2: PAKnotes

Using PAKnotes to document your work . . . . .	2.1
Create a PAKnote Project Journal . . . . .	2.2
Link a PAKnote to a File. . . . .	2.3
Create a Text PAKnote . . . . .	2.7
Create a Movie PAKnote . . . . .	2.8
Creating New PAKnote Templates . . . . .	2.10

## Chapter 3: Browsing the Data

An Overview of the Sooner Field . . . . .	3.1
Defining Wells and Boreholes . . . . .	3.2
Query the Well Data Base . . . . .	3.2
Query Wells for Formation Tops. . . . .	3.3
Query Wells for Formation Tops and Core Data. . . . .	3.4
Save a Well Query Script . . . . .	3.6
Well Query Class Exercise. . . . .	3.7
Query for Time-Depth charts . . . . .	3.7
Limit the X/Y Range of a field. . . . .	3.8
Create a Queried subset of Deep Wells . . . . .	3.9
Display Well Subsets . . . . .	3.10
Well Spreadsheet. . . . .	3.10
Highlight Wells . . . . .	3.14
Using Bubble Maps on the Base Map . . . . .	3.17
Query Seismic Surveys . . . . .	3.20
Survey Details . . . . .	3.22
Survey Spreadsheet. . . . .	3.23

## Chapter 4: Navigating the Seismic Data

Inlines and Crosslines . . . . .	4.2
2D Lines. . . . .	4.6
Create a 2D Survey Working Set. . . . .	4.6
Survey Subset Properties. . . . .	4.7
Arbitrary Lines . . . . .	4.8
Arbitrary Line Across 2D Surveys . . . . .	4.8

Saving an Arbitrary Line . . . . .	4.11
Arbitrary Line Across 3D Survey . . . . .	4.11
Selecting a Saved Arbitrary Line . . . . .	4.12
Time Slices . . . . .	4.12
Generate Slices . . . . .	4.13
Panning Through A 3D Volume . . . . .	4.14
Area of Interest Polygon . . . . .	4.14
Seismic Display Options Class Exercise . . . . .	4.17
Amplitude Scale . . . . .	4.17
Horizontal and Vertical Scale . . . . .	4.18
Display Options . . . . .	4.19
Color Bar Selection and Editing . . . . .	4.21

## Chapter 5: Seismic Quality Control Tools

Seismic Mistie Analysis . . . . .	5.1
Bulk Mistie Analysis . . . . .	5.1
Interactive Mistie Analysis . . . . .	5.13
Balancing Amplitudes (Optional) . . . . .	5.16
Creating Synthetic Seismograms . . . . .	5.18
Entering the SynPAK Parameters . . . . .	5.18
T-D Chart Tab/Panel . . . . .	5.20
Velocity Tab/Panel . . . . .	5.21
Density Tab/Panel . . . . .	5.22
Ref(ERENCE) Log Tab/Panel . . . . .	5.23
Wavelet Tab/Panel . . . . .	5.24
Trace Tab/Panel . . . . .	5.25
Update Tab/Panel . . . . .	5.28
Editing the Synthetic Seismogram . . . . .	5.31
Save the Synthetic Seismogram . . . . .	5.31
Remove the Synthetic from Display . . . . .	5.31
Inversion . . . . .	5.32

## Chapter 6: Working with Well and Log Data

Displaying Well Data . . . . .	6.1
Overpost Corrections . . . . .	6.4
Deviated Borehole Posting . . . . .	6.4
Edit Well Data . . . . .	6.6
Well/Borehole Creation . . . . .	6.7
Locking Kelly Bushing and Well/Borehole Locations . . . . .	6.9
Edit Well Symbols . . . . .	6.10
Add a New Well Symbol . . . . .	6.11
Assign a Well Symbol . . . . .	6.13
Log Curve Management . . . . .	6.15
Log Spreadsheet . . . . .	6.15
Create a Log Subset . . . . .	6.17
Log Curve Table . . . . .	6.18
Histogram . . . . .	6.20
Log Curve Aliasing . . . . .	6.21

Create Log Aliases . . . . .	6.21
Edit Log Curve Data . . . . .	6.23

## Chapter 7: Creating Cross Sections

Cross Sections . . . . .	7.1
Make a Cross Section Index Map . . . . .	7.2
Cross Section Vertical Display . . . . .	7.5
Define Log Track Template . . . . .	7.9
Log Aliasing Example . . . . .	7.12
Shade Log Curves . . . . .	7.13
Constant Shading . . . . .	7.13
Facies Shading . . . . .	7.14
Posting Test Information . . . . .	7.18
Crossover Shading . . . . .	7.20
Log Signature Map . . . . .	7.23
Use PAKnotes to Open Cross Sections from the Project Tree . . . . .	7.27

## Chapter 8: CrossPlot

Crossplot and Basic Facies Modeling . . . . .	8.1
Facies Modeling . . . . .	8.5
Depth Range . . . . .	8.5
Crossplot Scales/Settings . . . . .	8.5
Multiple Curves on a Single Axis . . . . .	8.6
Navigate the Crossplot Window . . . . .	8.7
Create Facies Polygons . . . . .	8.9
Making Facies Polygon Edits . . . . .	8.12
Generate a Facies Log . . . . .	8.15
Examine the Facies Log . . . . .	8.16
Facies Crossplot using Field Parameters . . . . .	8.17
Determine Net Pay using Facies Crossplot . . . . .	8.20

## Chapter 9: Electric Log Calculations

Log Calculations . . . . .	9.1
If-Then-Else . . . . .	9.2
Simple Statistics . . . . .	9.3
Amplitude Clipping . . . . .	9.6
Resample Multiple Logs . . . . .	9.10
Smooth Curves . . . . .	9.11
Equations . . . . .	9.13
Create a Velocity Log . . . . .	9.14
Calculate Water Saturation . . . . .	9.18

## Chapter 10: Interpret Formation Tops

Create Formation Tops . . . . .	10.1
Create a Formation Top Alias . . . . .	10.2
Editing Formation Tops . . . . .	10.7
Display Formation Tops . . . . .	10.9

Correlating Formation Tops . . . . .	10.13
Drag Log Curves . . . . .	10.14

## Chapter 11: Interpret Faults

Unassigned Fault Technique . . . . .	11.1
Digitize the Fault . . . . .	11.4
Edit Fault Segments . . . . .	11.7
Display Fault Segments on a Base Map . . . . .	11.10
Pick Faults on Arbitrary Lines . . . . .	11.10
Save an Arbitrary Line . . . . .	11.11
Display a Saved Arbitrary Line . . . . .	11.11
Pick Faults on Multiple Arbitrary Lines . . . . .	11.12
Pick Faults on Time Slices . . . . .	11.13
Set the Time Slice Skip Increment . . . . .	11.15
Creating Faults . . . . .	11.16
Assign the Unassigned Faults . . . . .	11.17
Method One: Fault Assignment on a Vertical Line . . . . .	11.18
Method Two: Time Slice Fault Assignment . . . . .	11.19
Method Three: Fault Assignments in VuPAK . . . . .	11.20
Explanation of Automated Fault Surface Generation . . . . .	11.22
View Fault Surfaces on Base Map . . . . .	11.23
Fault Surface Management . . . . .	11.24
Display Tab . . . . .	11.24
Display Mode Box . . . . .	11.25
Delete tab . . . . .	11.26
Keyboard Shortcuts for Faults . . . . .	11.28
Make a Fault Cut Assignment in a Borehole (Optional Exercise) . . . . .	11.28

## Chapter 12: Interpret Horizons

Create a Horizon . . . . .	12.1
Display Horizon Toolbar . . . . .	12.2
Horizon Picking Parameters Explanation . . . . .	12.4
Horizon Picking . . . . .	12.7
Correlation Polygon . . . . .	12.9
Create Fault Polygons . . . . .	12.11
Manual Fault Polygon Generation . . . . .	12.11
Assign Unassigned Fault Polygons . . . . .	12.15
Display Down Thrown Symbols . . . . .	12.16
Associate Fault Polygons with Surfaces . . . . .	12.19
Generate Automatic Fault Polygons . . . . .	12.20
Horizon Auto-Picking . . . . .	12.22
Basic Autopicking and Polygon Hunt . . . . .	12.22
Polygon Smooth . . . . .	12.24
Polygon Erase . . . . .	12.25
Autopick - 3D Hunt . . . . .	12.25
Display Horizon Amplitudes on Base Map . . . . .	12.26
VuPAK - SurfaceHunt . . . . .	12.28
Horizon Snap . . . . .	12.30

## Chapter 13: Gridding

Definitions . . . . .	13.1
Data Adaptive Algorithms . . . . .	13.3
Gradient Projection . . . . .	13.3
Inverse Distance to a Power . . . . .	13.4
Natural Neighbor . . . . .	13.4
Mathematical Model Algorithms . . . . .	13.5
Cubic Spline . . . . .	13.5
Statistical Model Algorithms . . . . .	13.6
Kriging . . . . .	13.6
Collocated Cokriging . . . . .	13.7
Strategy . . . . .	13.8
Guidelines for Gridding 2D or Sparsely Picked 3D Data . . . . .	13.9
Gridding Algorithm Table - A Guide . . . . .	13.10
Grid Data . . . . .	13.11
Select one or more data items to grid . . . . .	13.12
Specify Output Grid Name and Gridding Parameters: . . . . .	13.12
Other Specify Grid Parameters Options . . . . .	13.14

## Chapter 14: Contouring

Triangulation . . . . .	14.1
Contour Annotation . . . . .	14.3
Smoothing Contours . . . . .	14.3
Contouring and Fault Polygons . . . . .	14.4
Contouring . . . . .	14.5
Compute tab . . . . .	14.6
Annotation tab . . . . .	14.7
Line tab . . . . .	14.8
Hachure tab . . . . .	14.8
Control Points tab . . . . .	14.8
Polygon tab . . . . .	14.8
Generate Contours . . . . .	14.8
Grid and Contour a Formation Top using Inverse Distance . . . . .	14.11
Editing Contours . . . . .	14.13
Contour Toolbar . . . . .	14.14
Contouring Tips . . . . .	14.17
Displaying Multiple Contour Sets . . . . .	14.18
Create a Culture Group . . . . .	14.20
Order the Display of Culture Groups . . . . .	14.24
Delete a Culture Layer . . . . .	14.26
Polygon Management . . . . .	14.27
Importing or Exporting Planimeter Polygons . . . . .	14.29
Tiff and GeoTiff . . . . .	14.30
Importing Culture Shape Files . . . . .	14.32
Overview . . . . .	14.32
Import a Culture Shape File . . . . .	14.32
Display and Edit a Culture Layer . . . . .	14.35
Rename the Layer . . . . .	14.37

**Chapter 15: Time to Depth Conversion**

Techniques . . . . .	15.1
Computing Options for Average Velocity or Interval Velocity . . . . .	15.2
Create a Work Tree for the following Depth Conversion exercises . . . . .	15.3
Depth Map by Shared T-D Chart . . . . .	15.5
Depth Map by Average Velocity Map . . . . .	15.7
Edit the Average Velocity Map . . . . .	15.10
Display Velocity Values at Well Locations (Control Points) . . . . .	15.11
Edit the Average Velocity Contours . . . . .	15.13
Create a Grid of the Edited Average Velocity Contour Map . . . . .	15.14
Convert Time to Depth using Average Velocity . . . . .	15.15
Depth Maps by Isopach Maps . . . . .	15.17
Compute Interval Velocity Maps . . . . .	15.19
Create Isopach Maps . . . . .	15.20
Sum the Isopach intervals to create a depth map . . . . .	15.20
Depth Map by Constant Velocity . . . . .	15.22

**Chapter 16: Working with Surfaces**

Calculator . . . . .	16.1
Basic Math Calculator . . . . .	16.2
Smooth times along horizon NBRR using a 5X5 operator . . . . .	16.6
Math on Two Maps Calculator . . . . .	16.7
Calculate a dip map on the NBRR horizon . . . . .	16.10
Create a D Sand to Base D Sand Isopach Map . . . . .	16.13
Horizon Attributes . . . . .	16.14
Volume Attributes . . . . .	16.17
Extended Math Calculator . . . . .	16.21
Convert TVD(Seismic) depth map to subsea values . . . . .	16.24
Calculator Tips . . . . .	16.27
Calculator Summary . . . . .	16.28

**Chapter 17: Creating and Using Zones**

Zone Management . . . . .	17.1
Calculate attributes for the zone . . . . .	17.3
Create grids on results of the Zone Attribute Calculator for the D Sand Zone . . . . .	17.4
Net to Gross . . . . .	17.4
Net Sand . . . . .	17.6
Grid the Net sand values for the D Sand using a Kriging algorithm . . . . .	17.9
Water Saturation . . . . .	17.10
Contour and color a grid: . . . . .	17.11
View Zone Data . . . . .	17.13
Hydrocarbon Pore Volume Map . . . . .	17.13

**Chapter 18: Volumetrics**

Volumetrics Explanation . . . . .	18.1
Volumetric Models . . . . .	18.3
Optional volumetric calculations derived from the gross volume . . . . .	18.4

Volumetrics Calculation . . . . . 18.5

**Chapter 19: Bubble Map Displays**

Attribute Maps . . . . . 19.1  
Bubble Map . . . . . 19.3  
Multiple Attributes Bubble Maps . . . . . 19.6  
Crossplotting Production Data over Time. . . . . 19.8  
Alternative Method for Viewing Cross Plots . . . . . 19.12

**Chapter 20: Presentation Cross Sections**

Faults in Cross Sections . . . . . 20.1  
Flatten Cross Section . . . . . 20.5  
Seismic Display on Cross Section . . . . . 20.7  
Picked Log Intervals . . . . . 20.10  
Normalize Well Log Curves . . . . . 20.16  
Normalizing Process . . . . . 20.16  
Examine the Picks . . . . . 20.17

**Chapter 21: Composite Log Management**

Composite Log Attribute Management. . . . . 21.3  
Basic Workflow. . . . . 21.4  
Build a Composite Log Template . . . . . 21.4  
Create the Composite Log Tracks . . . . . 21.8  
Create the Panel Attributes for each Composite Log Track. . . . . 21.8  
Assign the Composite Logs to Unique Track locations . . . . . 21.10  
Enter Attribute data in the Composite Log Table . . . . . 21.11  
Final Composite Log Display . . . . . 21.13

**Chapter 22: Creating the Presentation**

Using third party applications with PAKnotes. . . . . 22.5  
AVI Movies . . . . . 22.8  
Using Animation for Effect . . . . . 22.8  
VuPAK Animation . . . . . 22.12  
Using PowerPoint within 2d/3dPAK - EarthPAK. . . . . 22.13  
Sending Presentation Files to PowerPoint. . . . . 22.14

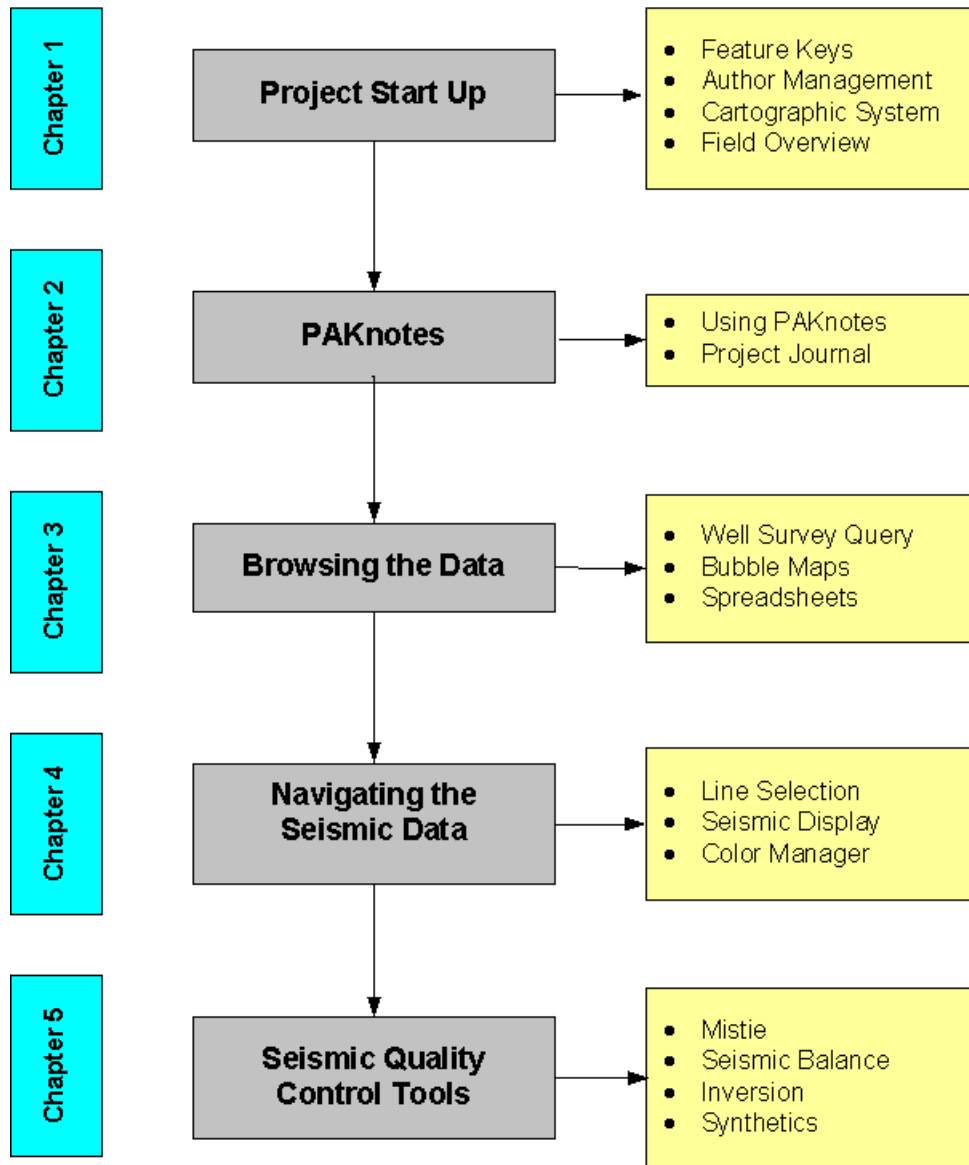

**Appendix A: PAKnotes**

Purpose of PAKnotes . . . . . A.1  
Tutorial Data Set . . . . . A.1  
Starting PAKnotes . . . . . A.2  
Two Parts of PAKnotes: Application and Object. . . . . A.3  
Authorship of PAKnotes . . . . . A.4  
PAKnotes Definitions . . . . . A.5  
Types of PAKnotes . . . . . A.7  
Icons used by PAKnotes . . . . . A.8  
Object Icons . . . . . A.8

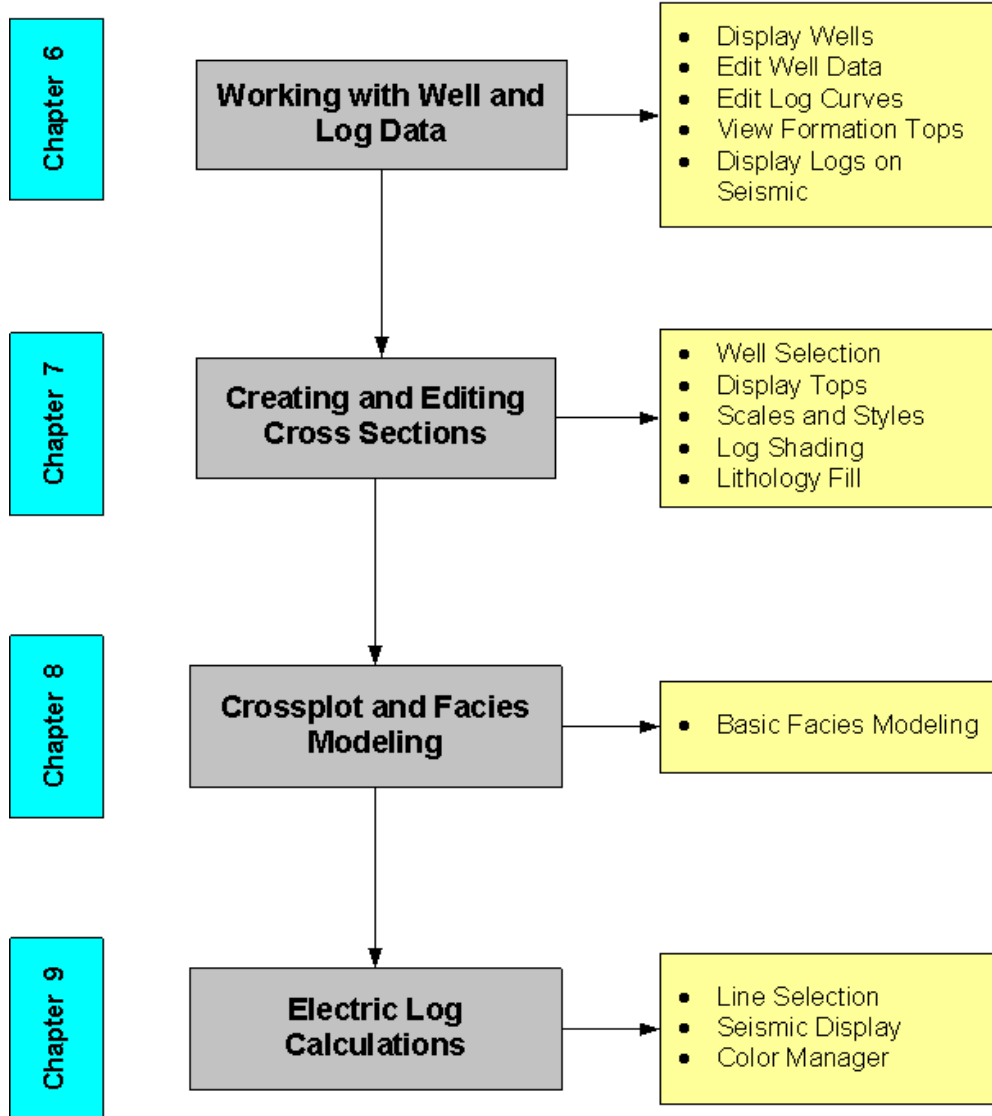

Other Icons . . . . . A.8  
Using PAKnotes . . . . . A.9  
    PAKnotes Examples: . . . . . A.9  
    Renaming PAKnotes . . . . . A.13  
    Displaying PAKnotes . . . . . A.14  
    Creating a Copy of a PAKnote . . . . . A.15  
    Creating a new PAKnote Text File . . . . . A.17  
    Attaching a Movie. . . . . A.20  
    Web References PAKnotes . . . . . A.22  
    Using Other Third Party Applications . . . . . A.22  
    Creating New PAKnote Templates . . . . . A.25

# Course Agenda

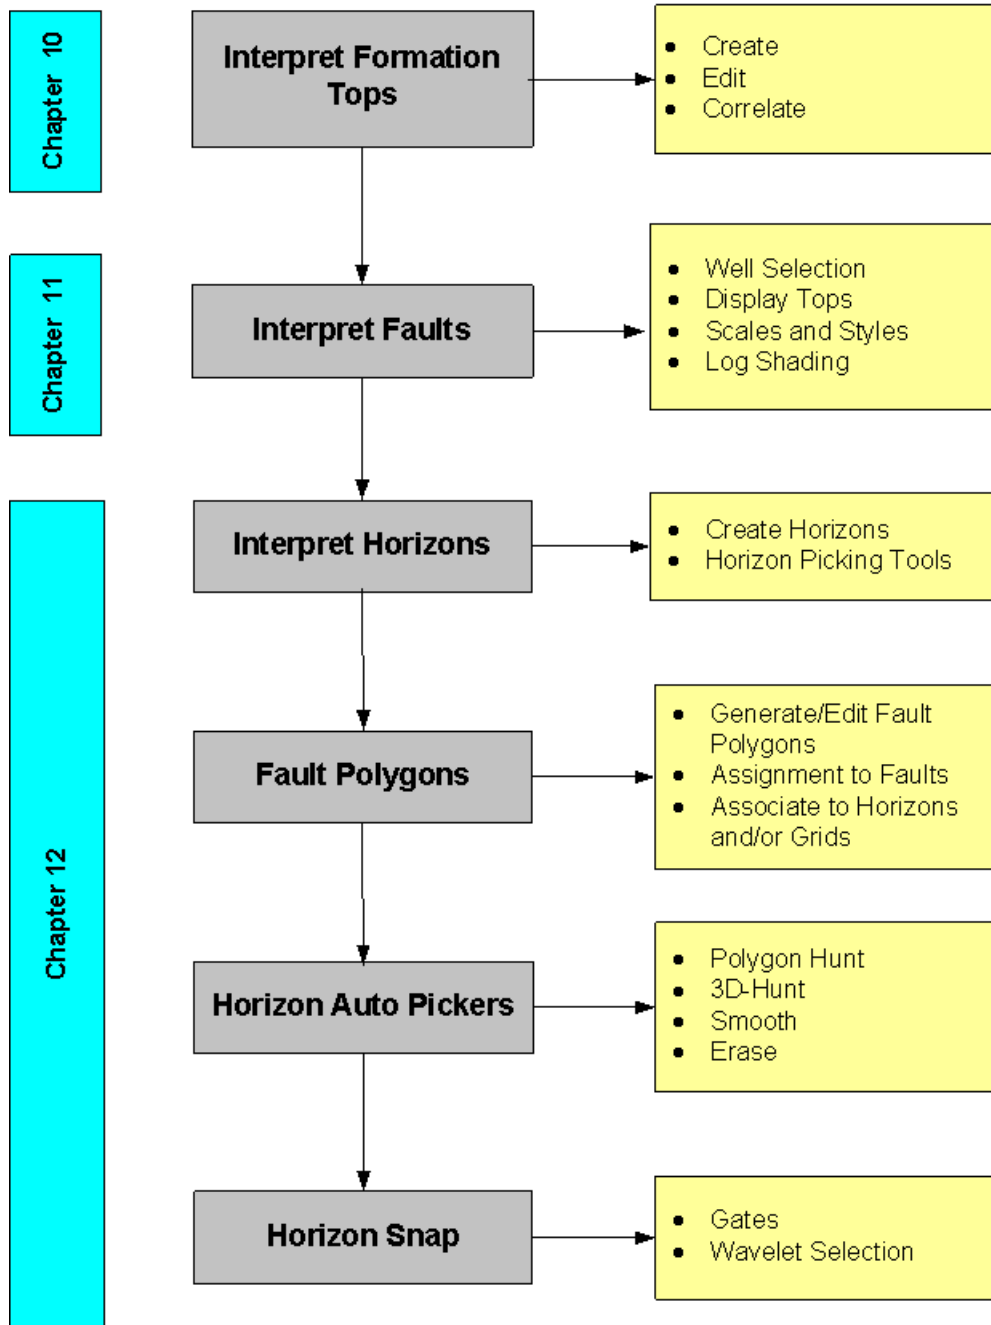

## Day 1 – Course Workflow

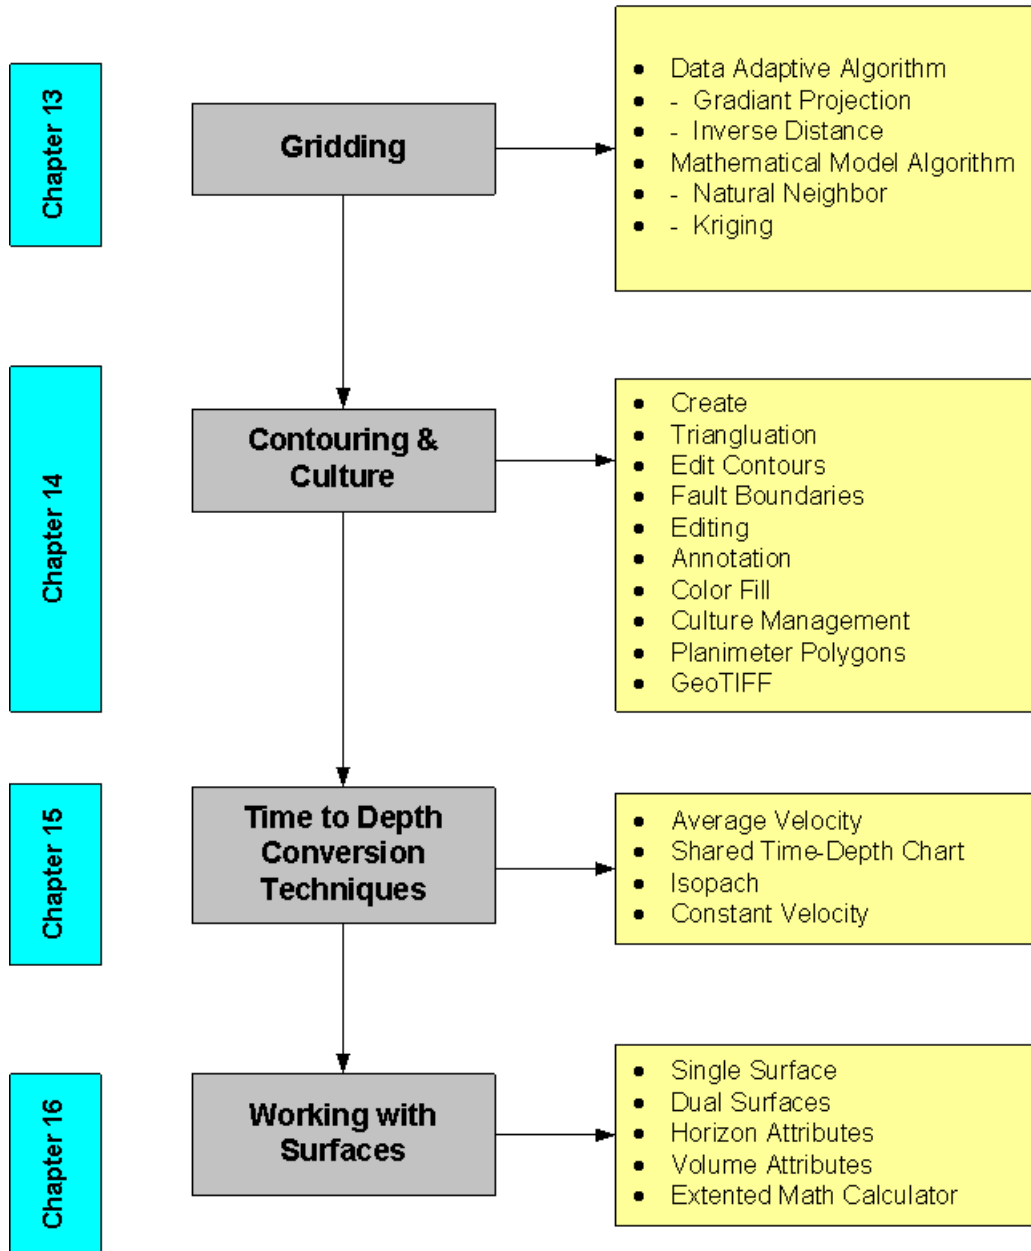

Day 2 – Course Workflow

### Day 3 – Course Workflow

Day 4 – Course Workflow

### Day 5 – Course Workflow
